Dear Supporter,

President Obama's Health Care Law was signed into law 2 years ago today. Yet, you will not see the President celebrating or talking much about this legislation.

Just a few days before the bill was passed, then Speaker Nancy Pelosi proclaimed, "we have to pass the bill so that you can find out what is in it." As the American people learn more about what is actually in the bill, public opinion is turning.

**Do you really want the same Washington who brought you the compassion of the IRS, the competence of federal bureaucrats, and the efficiency of the Hurricane Katrina response to deliver the health care your family depends on?**

**This month the non-partisan Congressional Budget Office (CBO) announced that the new health care law will cost hardworking taxpayers nearly double what was promised by the President.**

This is just the latest in a string of broken promises about, and failures of, the President's new health care law that has meant higher costs for patients and taxpayers while raiding Medicare and putting seniors and veterans at risk.

I working to repeal this bad health care law and replace it with legislation that gives American's what they really wanted from health care reform.

**March 31st is a crucial deadline in my campaign.** At midnight, we have to report our contributions to the FEC, and I need your help to send a message to Washington, DC that those who fight for common sense principles are strongly supported in Iowa. **Please make your contribution to my campaign before this very important deadline.**

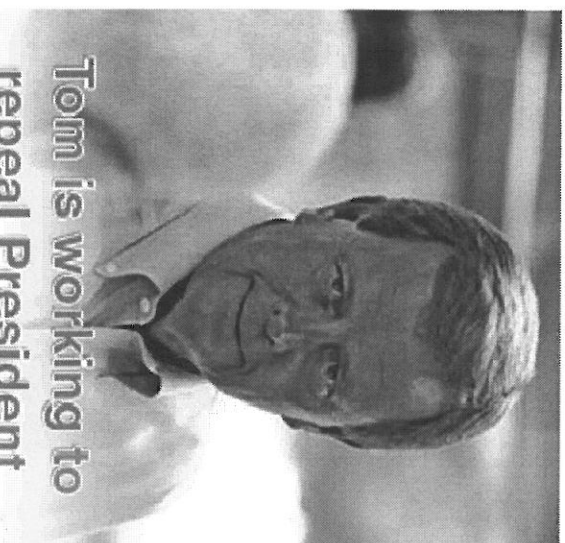

Your contribution of \$500, \$100, \$50 or even \$25 will send a strong message that our district has had enough of Obama's double-speak and empty promises.

Thank you for your support.

A handwritten signature in black ink that reads "Tom".

Tom Latham

P. S. Your donation before the March 31st deadline is crucial to our efforts. **Please show your support today.**
